

Language Immersion Centre, Gloucester

Client –	Gloucestershire County Council
Main Contractor –	EG Carter & Co Ltd
Architect –	Feilden Clegg Bradley Studios
Services Value -	£700K

Language immersion is a new concept in learning new languages where the student is provided with an intense and interactive experience similar to actually being in a foreign country.

The Gloucester Language Immersion centre is one of the first such facilities in the UK and Axiom Building Services Ltd are please to have been selected for the provision of mechanical and electrical services in the building.

The building itself is located near the docks in one of the oldest parts of the City and the installation faced challenges from all sides to protect the heritage all around while delivering a hi-tech facility for the 21st century.

Services provided include electrical systems, IT systems, cooling, heating, ventilation and security to both the teaching areas and the 11 bedroom residential facility.
