

project update

Berkeley College

Client -	South Gloucestershire and Stroud College
Main Contractor -	Kier
Architect -	Hewitt Studios
Services Value -	£1.5m

The former Berkeley Power station has been a landmark on the River Severn for more than sixty years but since it's decommissioning in 1989 the non-nuclear part of site has been partly occupied by various businesses until the whole area was acquired by SGS College for development of a new campus.

Axiom have been pleased to have designed and built the mechanical & electrical services for the new skills centre. The building was formally the heavy engineering workshop for the power station and features of the buildings former use have been skilfully incorporated into the new building to create an innovative and flexible space for study and vocational skills training.
